# AJAY DHUNGEL

Platform & DevOps Engineer
dhungelajay@gmail.com – linkedin.com/in/ajaydhungel – github.com/ajaydhungel7 – ajaydhungel.blog
+1 437 870 6261 – Toronto, ON (Relocation OK)

## Summary

Platform & DevOps Engineer and 4-year AWS Community Builder. Ran AWS platform operations for a startup with frequent production releases on EKS; led 45+ Well-Architected Reviews for SaaS and regulated financial services clients. Two-time AWS Summit Toronto speaker.

## Experience

**DevOps Engineer** | Deskree Technologies Inc | Toronto, ON — Mar. 2025 – Feb. 2026

- Owned AWS platform operations (EKS, RDS Aurora, VPC, ALB, Cloudflare DNS) as primary on-call for a 5-developer startup shipping daily.
- Resolved production incidents including the us-east-1 regional outage, RabbitMQ pod failures, and broken container image releases.
- Cut monthly CloudWatch costs by ~80% by rightsizing metric collection intervals.
- Built alerting and observability: Python Lambda functions routing database alarms to Slack, Sentry for backend errors, Grafana dashboards on CloudWatch and Prometheus.
- Built GitHub Actions CI/CD pipelines for a multi-agent platform on EKS: Docker builds pushed to ECR and manifests applied to the cluster, enabling daily releases with zero manual deployments.
- Brought console-created resources under Terraform Cloud across 2 AWS accounts, with per-environment workspaces and prod merges gated on a passing dev run.
- Maintained SOC 2 audit readiness via Vanta, remediating flagged access and misconfiguration findings.

**Cloud Engineer** | Genese Solution (AWS Partner) | Kathmandu, Nepal — Mar. 2022 – Dec. 2023

- Architected serverless microservice platform for Cross River Bank on AWS – Lambda, DynamoDB, SNS, and API Gateway across multiple independent services.
- Built infrastructure for a containerised Django platform with Terraform and Terragrunt: ECS backend, S3 and CloudFront frontend, CodeBuild pipelines.
- Led 45+ AWS Well-Architected Framework Reviews, identifying risks and producing remediation roadmaps for SaaS and regulated financial services clients.
- Drove AWS DevOps Competency validation across 4 client workloads, remediating IaC, high-availability, and security gaps; Genese achieved the designation.

## Certifications

| | |
|---|---|
| AWS Certified Solutions Architect – Professional | Jan. 2026 |
| AWS Certified DevOps Engineer – Professional | Sep. 2024 |
| AWS Certified Generative AI Developer – Professional | Jan. 2026 |
| AWS Certified Security – Specialty | Oct. 2026 |
| HashiCorp Certified: Terraform Associate (003) | Dec. 2023 |

## Community & Accomplishments

- AWS Golden Jacket – holder of all 12 active AWS certifications.
- AWS Community Builder (2023–2026) | All Builders Welcome Grant, Amazon Web Services, 2025.
- AWS Certification Subject Matter Expert | selected by AWS to review and contribute to certification exam content.
- Speaker: AWS Summit Toronto 2025 – Multi-Agent Collaboration on Amazon Bedrock.
- Speaker: AWS Summit Toronto 2026, Community Lounge – Building a Personal AI Assistant with OpenClaw on AWS.

## Education

Lambton College, Toronto, ON | Ontario College Graduate Certificate, DevOps for Cloud Computing (Dean's List) 2024–25
Tribhuvan University, Kathmandu, Nepal | Bachelor of Information Management 2022

## Technical Skills

Cloud & IaC: AWS (EC2, EKS, ECS, RDS, Lambda, VPC, IAM, S3, ECR, Bedrock), Terraform, Terragrunt, Ansible, CloudFormation
Containers & CI/CD: Kubernetes, Docker, Helm, ArgoCD, GitHub Actions, GitLab CI, Jenkins
Observability: CloudWatch, Prometheus, Grafana, Datadog, Sentry
Scripting: Python, Bash
