Summary

DevOps Engineer with 4+ years delivering secure, scalable AWS infrastructure across SaaS and multi-client environments. Experienced in Terraform, Terragrunt, Kubernetes (EKS), and GitHub Actions CI/CD with a security-first approach. Contributed to AWS DevOps Competency designation as an AWS Partner engineer, with a proven track record of maintaining 99.9% uptime, reducing costs, and aligning infrastructure with compliance and reliability standards

Skills

- **Container Orchestration:** Kubernetes clusters and docker container platforms management
- **CI/CD:** End-to-end pipeline design and automation with GitHub Actions and Jenkins , gitops with ArgoCD
- **Configuration Management:** Design and maintain flexible configuration systems
- **Security First:** DevSecOps, shift-left practices, SOC 2 alignment, secrets management
- **Infrastructure as Code:** Modular IaC development with Terraform and Ansible for configuration
- **Observability:** CloudWatch, Container Insights, Prometheus, Grafana, Datadog
- **Cost Discipline:** Right-sizing, efficiency, and long-term sustainability
- **Scripting:** Bash/shell scripting along with Python to automate repetitive tasks

Work experience

DevOps Engineer,

03/2025 to 02/2026

Deskree Technologies Inc – Toronto, ON

- Led AWS platform operations (EKS, RDS Aurora, VPC, ALB) to deliver 99.9% uptime and cost-efficient production systems.
- Built modular Terraform stacks with dev/prod Terraform Cloud workspaces connected to GitHub VCS, automating plan/apply workflows, centralizing secrets via AWS Secrets Manager, and importing untracked resources to bring infrastructure fully under IaC control.
- Built GitHub Actions CI/CD pipelines for containerized Next.js, TypeScript backend, and Python MCP server services, automating builds, tests, and image delivery to ECR, with Ansible playbooks bootstrapping EKS clusters and deploying ArgoCD via the App of Apps pattern for GitOps-based deployments
- Centralized observability via CloudWatch and Container Insights, building Python Lambda functions triggered by CloudWatch alarms to deliver alerts to Slack, optimizing metrics collection intervals and rightsizing resources to reduce monitoring and infrastructure costs.
- Maintained SOC 2 compliance using Vanta, triaging and remediating flagged controls to ensure continuous audit readiness.
- Administered multiple AWS accounts under consolidated billing as sole DevOps engineer, managing IAM users, roles, and policies to enforce least-privilege access across engineering teams and all cloud resources.

Cloud Engineer,

03/2022 to 12/2023

Genese Solution – Kathmandu, Nepal

- Designed and operated serverless microservice architectures on AWS using Lambda, DynamoDB, and API Gateway with CloudFormation, delivering 99.9% platform availability for clients.
- Automated infrastructure provisioning and microservice deployments for Cross River Bank using Terraform, CloudFormation, CodePipeline, and Jenkins, streamlining release workflows across multiple Lambda-based services.

- Led 45+ AWS Well-Architected Framework Reviews across multiple client accounts, producing detailed architecture diagrams in Lucidchart and Draw.io to communicate findings and align clients with AWS best practices.
- Conducted IAM audits and vulnerability assessments across multiple client AWS environments, implementing data protection and security best practices in regulated cloud environments.

AWS Cloud Support Engineer,

04/2021 to 03/2022

Swostech Solutions – Kathmandu, Nepal

- Supported AWS Well-Architected Framework Reviews and deployed Sendy email platforms on Ubuntu EC2 instances integrated with Amazon SES, maintaining 99.99% EC2 uptime across client environments.
- Led database migrations to Amazon RDS for multiple clients using AWS SCT and DMS, maintaining continuous replication to ensure zero-downtime cutovers and optimizing post-migration costs through rightsizing
- Migrated client workloads to AWS including WordPress sites to Lightsail, web servers to EC2, and application stacks to Elastic Beanstalk, modernizing infrastructure for clients transitioning from on-premise to cloud.

Education

Post-Graduate Certificate: DevOps For Cloud Computing,

2025

Lambton College - Toronto

- Graduation Dean's List

Bachelor: Information Management,

2022

Tribhuvan University - Kathmandu

Certifications

- AWS DevOps Engineer - Professional
- AWS Solutions Architect - Professional
- AWS CloudOps Engineer - Associate
- AWS Solutions Architect - Associate
- HashiCorp Terraform Associate (003)

Community Contribution and Accomplishments

AWS Community Builder since 2023

All Builders Welcome Grant recipient 2025

Presentation: AWS Summit Toronto 2025 (Multi Agent Collaboration on Amazon Bedrock)

Presentation: AWS Summit Toronto 2026 (Configuring Openclaw agents on AWS environment in minutes)
