SUMMARY

Knowledgeable Infrastructure Engineer with solid background in automating infrastructure, managing CI/CD pipelines, and enhancing system reliability. Proven track record of implementing scalable solutions and optimizing deployment processes. Demonstrated expertise in cloud services and scripting, effectively collaborating with cross-functional teams to achieve operational excellence.

SKILLS

- **Container Orchestration:** Kubernetes and container platforms management
- **CI/CD:** End to end robust pipelines development with tests and safe releases
- **Infrastructure as Code:** Modular IaC development with secrets management
- **Configuration Management:** Design and maintain flexible configuration systems
- **Scripting:** Bash/shell scripting along with Python to automate repetitive tasks
- **Security First:** Secure infrastructure planning and delivery (shift-left method)
- **Cost Discipline:** Right-sizing, efficiency, and long-term sustainability

WORK EXPERIENCE

- DevOps Engineer,** 03/2025 - 02/2026
Deskree Technologies Inc – Toronto, ON
- Led AWS platform operations (EKS, RDS Aurora, VPC, ALB) to deliver 99.9% uptime and cost-efficient production systems.
 - Designed modular Terraform/Terragrunt stacks and VCS workflows with branch protection rules, cutting drift significantly, around 30%
 - Built GitHub Actions CI/CD pipelines for automated builds, tests, and deployments, halving release time.
 - Centralized observability via CloudWatch, Container Insights, and custom metrics, reducing monitoring costs by 30%.
 - Owned infrastructure design, monitoring, incident response, and AWS cost optimization with scalable, reliable architecture.
- Cloud Engineer,** 03/2022 - 12/2023
Genese Solution – Kathmandu, Nepal
- Led design and operation of scalable, cost-efficient AWS infrastructures (EKS, ECS, Lambda) ensuring 99.9% uptime.
 - Automated provisioning and deployments using Terraform and Cloudformation templates, and CI/CD pipelines, cutting release cycles by over 50%.
 - Supported clients as an AWS Partner engineer, guiding Well-Architected reviews and aligning systems with AWS best practices.
 - Conducted security assessments and implemented best practices for data protection in the cloud environment.
 - Constructed detailed architecture diagrams reflecting user specifications for enhanced clarity and communication.

AWS Cloud Support Engineer,
Swostech Solutions – Kathmandu, Nepal

04/2021 - 03/2022

- Architected AWS solutions for client WAFR reviews and SES email platforms, achieving 99.99% uptime on EC2 instances.
- Led database migrations to RDS using schema conversion tools, optimizing costs through rightsizing and efficiency tweaks.
- Provided daily Linux server troubleshooting and support for multi-client environments, ensuring operational reliability.
- Built scalable microservices architectures to support diverse client services and workloads.

EDUCATION

Post-Graduate: DevOps For Cloud Computing
Lambton College - Toronto

08/2025

- Graduation Dean's List, [Fall, 2025]

Bachelor: Information Management,
Tribhuvan University - Kathmandu

06/2022

CERTIFICATIONS

- AWS Solutions Architect - Professional
- AWS DevOps Engineer – Professional
- AWS Generative AI Developer - Professional
- Hashicorp Terraform - Associate
- AWS Solutions Architect - Associate
- AWS SysOps Administrator - Associate
